FIVE PACKAGES ONE-TIME PROJECT
FULL SOURCE HANDOVER

₹10,000 — ₹50,000+

SCROLL

 PACKAGE OVERVIEW

Five packages, from ₹10,000 to ₹50,000+

Every package is a **one-time website development project**. Prices cover the development work described in each package; domain and hosting are set up as infrastructure and may carry recurring third-party charges.

01

STARTER

₹10,000

one-time

A complete, professional website for a new business.

- ✓ Up to 4 pages
- ✓ Responsive mobile, tablet and desktop design
- ✓ Professional UI/UX
- ✓ Home, About, Services / Courses and Contact pages
- ✓ WhatsApp and click-to-call actions
- ✓ Google Maps integration
- ✓ Basic enquiry form
- ✓ Basic SEO setup and performance optimization
- ✓ Domain, DNS, hosting, SSL, deployment and handover

02

BUSINESS

₹15,000

one-time

Everything in Starter, expanded for a growing business.

- ✓ Up to 6 pages
- ✓ Custom UI/UX
- ✓ Photo gallery
- ✓ FAQ and testimonials sections
- ✓ Advanced enquiry form

03

PROFESSIONAL

₹22,000

one-time

Built to generate enquiries and show up in search.

- ✓ Up to 10 pages
- ✓ Fully custom page layouts
- ✓ Individual service / course pages
- ✓ Advanced gallery and advanced contact forms
- ✓ Google Analytics and Google Search Console
- ✓ Advanced on-page SEO
- ✓ Advanced performance optimization
- ✓ More advanced interactions

04

• POPULAR

BUSINESS PRO

₹35,000

one-time

A website your own team can update without help.

- ✓ Up to 15 pages
- ✓ Blog / news section
- ✓ CMS / content management
- ✓ Manage courses, services, gallery and testimonials
- ✓ Structured data / schema

05

CUSTOM PLATFORM

₹50,000+

one-time

Custom systems, dashboards, databases and integrations.

- ✓ Custom architecture
- ✓ Custom dashboard / admin panel
- ✓ Database integration
- ✓ Custom API integrations
- ✓ Payment gateway integration when required
- ✓ Authentication and user roles
- ✓ Custom workflows and automation
- ✓ Advanced business functionality

NOT SURE WHICH ONE

Tell us what the website needs to do — courses to show, forms to capture, people to manage — and we will tell you which package fits, or where a custom platform is the

honest answer.

VIKAS IT INSTITUTE · No annual website plan and no lifetime maintenance contract.

DETAILED COMPARISON

What each package includes, line by line

Higher packages include everything from the package before it, so each row only ever moves in one direction as you move right.

✓ included · — not included · a word means that exact level is included.

Domain, DNS, hosting, SSL and production deployment are set up in all five packages as infrastructure.

INFRASTRUCTURE

The services a website runs on

Every build includes the technical setup below. These are services provided by third parties and billed by them, not a lifetime free inclusion.

DOMAIN

Your web address, registered in your name and kept in your ownership.

- Domain selection
- Domain registration / setup
- DNS configuration

HOSTING

The server that keeps the website online, selected for speed and reliability.

- Hosting selection / setup
- Production deployment
- SSL / HTTPS
- Domain connection

SSL

HTTPS encryption on every page, so browsers show a secure connection.

DNS

Domain records pointed at the hosting so the address resolves correctly.

**DEPLOYMENT**

The finished website published to the live domain and tested there.

**PERFORMANCE**

Image, asset and caching work so pages load quickly on mobile networks.

**SEO**

Page titles, descriptions, structure and metadata prepared for search engines.

INFRASTRUCTURE IS BILLED SEPARATELY

Domain, hosting, business email, APIs, premium services and other third-party infrastructure may involve separate recurring charges, payable at the actual provider cost. Domain connection, DNS configuration, hosting configuration, SSL / HTTPS setup and production deployment are included in the selected package.

DELIVERY MODEL

Build once. Own your website.

The website development fee is a one-time project fee. After approval and final delivery, the website is handed over to the customer.

There is no annual website package, no yearly support plan and no lifetime maintenance contract. Future changes, new features and maintenance are separate services.

01

Final approval

You review the completed website on your devices and give final approval.

02

Website delivered

The final website is delivered to you as approved.

03

Production deployment

Production deployment is completed and the live site is checked on the real domain.

04

Project handover

Project and source files are handed over according to the agreement.

Domain, hosting, business email, APIs, premium plugins and other third-party infrastructure may involve separate recurring charges, payable at the actual provider cost.

WHAT'S INCLUDED

Included in every package, at every level

The essentials below are part of each package. The comparison table shows exactly where the higher packages add more.

DESIGN AND BUILD

- ✓ Responsive design for mobile, tablet and desktop
- ✓ Professional or custom UI/UX, depending on package
- ✓ Page layouts built for your content, not a template
- ✓ WhatsApp and click-to-call actions

VISIBILITY AND SPEED

- ✓ SEO setup, on-page SEO and Search Console as per package
- ✓ Google Analytics where included
- ✓ Performance optimization
- ✓ Structured data / schema in Business Pro and above

INFRASTRUCTURE

- ✓ Domain selection, registration and DNS configuration
- ✓ Hosting selection and setup
- ✓ SSL / HTTPS
- ✓ Production deployment

HANDOVER

- ✓ Final project handover
- ✓ Project and source files handed over according to the agreement
- ✓ Scope confirmed in writing before the build starts
- ✓ No annual website plan and no lifetime maintenance contract

How a project runs

Four stages, no annual cycle. The project ends at handover.

01

Choose a package

Compare the packages and pick the scope that matches what your business needs today.

02

Agree the scope

Pages, features, content and timeline are confirmed in writing before the build starts.

03

Build and review

The website is designed, built and shared for review, then adjusted as agreed.

04

Approve and hand over

Final approval, production deployment and handover of the project and source files.

IMPORTANT NOTES

Read this before choosing a package

These notes are part of the offer. If any line here does not match what you were told elsewhere, this page is the accurate one.

01 Website development is delivered as a one-time project.

The development fee covers building the website agreed in the package. It is not an annual website plan, and it is not a subscription.

02 Domain and hosting are billed separately.

03 Third-party services are charged separately.

04 Future changes are separate services.

05 Scope is confirmed before the build.

06 Custom Platform is priced to requirement.

07 Content is supplied by the customer unless agreed otherwise.

08 Prices are in Indian Rupees.

STILL
UNSURE

Ask for the notes in writing before you commit. If a note here is a problem for you, say so and the scope will be adjusted in the quotation.

NEXT STEP

Get a written scope and price

Choose a package above, or ask us to advise. You will receive the agreed pages, features, timeline and price in writing before any work starts.

This catalogue does not publish a phone number, address or email. The quote panel builds a written enquiry you can copy and send to VIKAS IT INSTITUTE through your usual channel.
